| 001 | BI201 | Ask all. Hello, my name is [interviewer name] from Roy Morgan Research. Could I please speak to [participant name]? |
| 002 | BI208 | Ask all. <i>Once participant is on the line:</i> Hello, I'm calling from Roy Morgan Research regarding the phone survey on smoking that you completed about this time last year. You may recall that the survey is being conducted by an international group of universities and research institutions in four countries. We are calling to ask whether you would be willing to answer the follow-up survey that would take about 45 minutes. <ol style="list-style-type: none"> 1 Continue; respondent on phone 2 Respondent refuses interview 3 Unable to continue If response = 1, go to 006/BI229. If response = 2, go to 003/BI425. If response = 3, go to 005/BI971. |
| 003 | BI425 | Ask if 002/BI208=2 and letter has been sent. This is an important survey because it is being conducted among smokers as well as non-smokers throughout the world. It's very important for the accuracy of the survey for people who agreed to do the survey to actually complete it. That is why we have sent you a [payment amount] cheque as a token of appreciation for your time. Will you help us now by completing the survey today? We can arrange another time for you to complete the survey, if this time is not convenient. <ol style="list-style-type: none"> 1 Yes 2 No 3 Make appointment 4 Start interview again <i>If another time, make appointment.</i> If response=1, go to 006/BI229. If response=2, go to 011/BI901. If response=3, make appointment. If response=4, go to 001/BI201. |
| 004 | BI426 | Ask if 002/BI208=2 and letter has not been sent. This is an important survey because it is being conducted among smokers as well as non-smokers throughout the world. It's very important for the accuracy of the survey for people who agreed to do the survey to actually complete it. We would like to thank each person who takes part by sending them a [payment amount] cheque. We do not have an address for you, but we would be happy to send you the [payment]. I can record an address at the end of the interview if you'd like. Will you help us now by completing the survey today? We can arrange another time for you to complete the survey, if this time is not convenient. <ol style="list-style-type: none"> 1 Yes 2 No |

| 047 | BR333 | <p><i>Interviewer Training and Instructions for Brand question:</i> <i>Emphasize "specific" in the question. If respondent gives a brand name that could fit several different entries in the coded list, probe as necessary for other descriptors, to determine whether any of the listed varieties matches the respondent's answer. If the response is vague or nonspecific, prompt respondent by saying: "What is the name you use when you ask for your brand in the store?" Always confirm your choice with the respondent: e.g. "There is a brand on my list that says "Basic Ultra Light Menthol 100s" -- would that be the same as your brand?" or "Would that be the brand you smoke most?" If the respondent's answer exactly matches the name on the list, simply read back the brand name as confirmation: e.g. "So your brand is Benson & Hedges Methol Mild King Size".</i> INTERVIEWER TRAINING -- Examples of probing: <i>If respondent gives no strength indication at all, ask "Is your brand any particular strength, or isn't that part of the brand name?" If respondent says "just regular strength" or "the plain kind" or "full flavour", confirm that he/she smokes the default strength: "So there's no mention of strength in your brand's name?" Sometimes "full flavour" is actually part of the brand name and sometimes it is unmentioned because it is the default strength. This same kind of probing applies also to cigarette length – the shortest length for a given brand family will generally be the default length and may not be mentioned by the respondent, but the interviewer should explicitly confirm this with the respondent: "you didn't mention what length your cigarette is. Would that be [regular/ King size...] that you smoke?"</i> <i>IN UK and AU, strength descriptors have been banned, so manufacturers use other words to discriminate among varieties. The different varieties include colours (blue, white, gold, etc) or words like "Fine" or "Smooth" in their names. Probing for these words can't mention strength, but rather interviewers should say: "Are there any other words that help identify the name of your brand?" OR "How do you ask for your specific brand in the store?" If the response could fit several different varieties on the list, ask specifically: "Would that be Pall Mall gold or Pall Mall white, or something else?" In the brand lists for UK and AU, these non-strength descriptors have been treated like strength descriptors, in that they immediately follow the brand family's name in the variety's listing.</i> <i>If respondent says "ultra light" and the list for that brand family includes only the term "mild," and never "light", then say: Could that be "ultra mild"? If the description offered by the respondent isn't specific enough and therefore fits both menthol and non-menthol entries, probe by saying: "Is that menthol or not menthol?" Similarly, if the description could apply to entries for multiple lengths – e.g. King Size and 100s -- probe by saying: "Do you smoke King Size or 100s, or some other length?"</i> </p> |
