		program even if they don't select ANY on-screen response (i.e. clicking 'next' at a question without endorsing any response). To enable this functionality, the GfK version of the web survey program has a background code programmed at every question called 'GfK no response', which behaves like a non-response option. This non-response option will NOT ever appear on-screen to the respondent and will only exist in the program code. It will be coded by default if any respondent advances past a question (clicks 'next') without selecting any on-screen answer option. --- In the web survey routing, this 'GfK no-response' code will be treated the same as if the respondent had selected 'Refused' (Prefer not to answer). --- An exception to this is for the US ETM Study invitation questions (ETM210a, ETM211a, ETM201a) where the GfK 'no response' code will be treated the same as if the respondent had selected 'No…'. However, in the case of any essential questions in the screener that determine eligibility, such respondents will be terminated.

		...we invite you to participate in the International Tobacco and E-Cigarette Policy Survey--a unique study of around 13,000 smokers, former smokers, and e-cigarette/ vaping device users in the United States, Canada, England and Australia. We now invite you to complete the survey online, at your convenience. **[All -- (C or P):]** The survey questions will ask you about your beliefs, attitudes, and behaviours related to tobacco and nicotine use. Your answers to these questions help us to better understand how views toward smoking may differ over time in these countries. Some questions ask you to provide general information about your background. There are no known risks associated with the survey. The benefits are that your responses will help policymakers and health professionals develop future policies and programs on tobacco and e-cigarettes.
022b	BI110b	First we'll ask you a few essential questions for statistical purposes and to determine if you're eligible to participate. Participation is voluntary and you may withdraw at any time. You may skip any non-essential questions. If you wish to withdraw your consent after initiating the survey, please send your request to [email address for survey help]. All personal information [**001/OwnerID=0, 7, 8, 70 or 80:** , including your name, address,] and survey answers will be kept strictly confidential and will not be shared with any person or group outside of the research team. The study data will be held in secure electronic files at the University of Waterloo (Canada) on computers that are secured, password-protected, and can only be accessed by the research team. Eventually, after two years, data without names or personal information may be shared with other health researchers. If you are eligible, we will contact you to participate in the follow-up study in about 18 months.
022c	BI110c	**Once you reach the last screen of the survey, your survey will be considered complete and your answers will be kept for analysis, unless you inform us that you want to withdraw your consent.** On the last screen of the survey, where we tell you that you are now considered as having completed the survey, **please make sure to click the 'submit' button at the bottom of the page.** This will allow us to more quickly provide you with [payment].

023	BI270	**Ask all.**
		If you have questions concerning how the survey is being conducted, concerns about your participation, or about the authority under which this survey is being conducted, please contact [ethics contact].
		
		On the following screen you will be provided with additional information on completing the survey.
		
		Consent to Participate
		With full knowledge of all foregoing, I agree, of my own free will, to participate in this study.
