The objectives of EUREST-PLUS are to monitor and evaluate the impact of the tobacco control policies within the Tobacco Products Directive (TPD), the newly adopted legislation in the EU, and assess these within the context of the WHO Framework Convention on Tobacco Control (FCTC) ratification at a European level. The primary objective of the project is to evaluate the psychosocial and behavioural impact of the TPD. The aims of this research are to find out:</p> <p>1) the impact of specific tobacco control policies within the TPD on residents of six European countries (Germany, Greece, Hungary, Poland, Romania, and Spain), 2) the prevalence and patterns of tobacco use behaviour within these countries, 3) the tobacco use behaviour and the impact of tobacco control policies between these countries and other countries within the ITC Project.</p>

		<p><b>Who is conducting this research?</b>  The ITC 6E Project is led and coordinated by the ITC Project at the University of Waterloo (UW) in Canada in collaboration with European Network of Smoking and Tobacco Prevention (Belgium) and research partners from the 6 project countries. The overall international project is being led by Professor Geoffrey T. Fong from the University of Waterloo, Canada, in collaboration with Dr. Ute Mons, German Cancer Research Center; Prof. Yiannis Tountas, University of Athens; Prof. Witold Zatonski, Poland Health Promotion Foundation; Krzysztof Przewozniak, Poland Health Promotion Foundation; Prof. Antigona Trofor, Aer Pur Romania; Prof. Esteve Fernandez, Institut Català d'Oncologia; Dr. Tibor Demjén, Smoking or Health Hungarian Foundation; Prof. Aristidis Tsatsakis, University of Crete; and Dr. Nicolas Bécuwe, TNS Opinion Europe.</p> <p><b>What are we asking of you?</b>  This research involves completing the survey interview (approximately 35 minutes) today. We plan to return approximately every 18 months to do follow-up surveys because we are interested in how people's opinions and behaviours might change over time.</p> <p><b>Survey Participation</b>  Involvement in this research is voluntary and you are free to withdraw at any time or may decline to answer any of the questions. If you agree to participate in this research, we will provide you with a token of appreciation for your time. You will be given a similar token of appreciation for each subsequent time that you agree to participate.</p> <p><b>Risk</b>  Participants will not face any risk or harm to their well-being either physically, psychologically, socially or culturally throughout completion of the survey.</p> <p><b>Possible Benefits</b>  This study will help the researchers to evaluate and understand the effects of national-level tobacco control policies in European Union Member States. Also policy makers throughout the world will be able to use this evidence to create and implement tobacco control policies for demonstrated effectiveness.</p> <p><b>Confidentiality and Security of Data</b>  All the information you provide is treated as strictly confidential. Data from this research will not be destroyed, but any identifying information about you such as name and address will be removed so that your answers cannot be linked back to you.</p> <p>The data will be held in secure electronic files at the survey firm TNS Opinion (Belgium) and at the University of Waterloo (Canada) on computers that have security certificates, are password protected, and can only be accessed by the research team. Eventually, after two years, the data without names or personal information may be shared with other health researchers.</p>

HE49515	HE49514	23-Jun-17	6E2	Michelle M	In 4CE1 and 6E1, question HE514 was simply "Emphysema", but for 6E2 the Romanian team requested to add "COPD" to this wording because Romanians are more familiar with that term. 4CE2 was changed to match, as it's only now asked for UK. The new "COPD or emphysema" question is given VarName HE515 to differentiate from W1.
