E-CIGARETTES -- CURRENT FREQUENCY		
036	EFintro1	Ask all. Before we continue talking about ordinary cigarettes, we would like to ask you briefly about ELECTRONIC alternatives.
037	MP08120	Ask all. There are a number of new products advertised as alternatives to smoking. These new products do not involve burning, just heating. We are particularly interested in two kinds: 1. Heated tobacco products (also called heat-not-burn products) heat actual tobacco in the form of cigarette-like sticks, in capsules or pods, or as loose cut tobacco leaf. Examples include: IQOS/HEETS, PloomTech, PAX, and glo. [Programmer: display HTP product image here] 2. Vaping products (often called e-cigarettes or vapes) heat a liquid only , but do NOT contain any actual tobacco. The liquid (also called e-liquid) often contains nicotine and may be tobacco-flavoured. Some e-cigarettes contain liquid when you buy them, and are disposable. Otherwise the liquid may be in a cartridge or pod, or come separately in a bottle. We will refer to these products as e-cigarettes or vaping devices.
